TENNESSEE HEART HEALTH NETWORK

Join the new Tennessee Heart Health Network

Be part of an innovative statewide initiative to
improve primary care for all Tennesseans

[LEARN MORE ABOUT IT](#)

TENNESSEE
HEART HEALTH
NETWORK

Welcome to Tennessee Heart Health Network!

We are a partnership committed to improving the health of Tennesseans with or at risk for cardiovascular disease. Tennessee is No. 3 in heart attacks and stroke, and we're here to change that.

Launched in January, the TN Heart Health Network has a strong start. More than 75 physician practices have enrolled as full research partners. Healthcare systems, health plans, professional and advocacy organizations, and academic institutions across the state have joined us as organizational partners. Importantly, we have funding and support from the U.S. Agency for Health Research and Quality (AHRQ). [Click here to see our press](#)

The Patient Voice

Many-Bears Grinder is former Tennessee Department of Veterans Services Commissioner and a retired colonel in the TN Army National Guard. She shares her story of overcoming diabetes and how doctors can help. [Watch her video here.](#)

Coming up in December...The Clinical Voice

Dr. Tracey Doering, former Tennessee Chapter Governor for the American College of Physicians, discusses her experience treating heart patients in her Nashville practice.

programs— health coaching, text messaging, and pharmacist-physician collaboration — are tools aimed at improving patient heart health by addressing two of the most potent cardiovascular disease risk factors: hypertension and tobacco use.

We are collecting the data we need to track our progress in improving key heart health metrics across Tennessee. To find out more, visit [The Tennessee Population Health Data Network \(TN-POPnet\)](#) online. It is supported by the University of Tennessee Health Science Center’s Tennessee Population Health Consortium.

64% of the patients in the data network already have their blood pressure under control

Represents adults in Tennessee Population Health Data Network with primary care providers.

Our goal is to dramatically increase BP control rates in Tennessee.

Join Us!

Whether you are a physician, nurse, pharmacist, office manager, or other member of a primary care team, or a patient, caregiver, or other patient advocate, we welcome your involvement.
